

Shankar Reddy Mopur

Agentic AI Intern

+91 9652366210 ◇ mopurshankareddy@gmail.com ◇ Andhra Pradesh ◇ [GitHub](#) ◇ [LinkedIn](#) ◇ [Portfolio](#)

SUMMARY

B.Tech AIML student with hands-on experience in **end-to-end data lifecycles**, including **EDA**, **predictive modeling**, and **visualization**. Demonstrated ability to translate complex data into business value via a **Deloitte Analytics simulation** and **credit-risk modeling**. Proficient in **Python**, **SQL**, and **Tableau**; ready to provide immediate analytical depth to a data-driven team.

EXPERIENCE

Agentic AI Intern Innomatics Research Labs	Feb '26 — May '26 India (Remote)
• Architecting autonomous AI agents using CrewAI and LangGraph to automate multi-step reasoning workflows and complex decision-making tasks. • Developing advanced RAG pipelines to transform static LLMs into dynamic, data-aware systems, improving information retrieval accuracy. • Engineering custom tool-integrations and API connectors to bridge LLMs with external data sources for real-world automation. • Optimizing agentic workflows to reduce manual intervention in data processing and reasoning cycles.	

SKILLS

AI & Agentic Systems :	Agentic AI (CrewAI, LangGraph), RAG, LLM Orchestration, Prompt Engineering
Machine Learning :	Supervised/Unsupervised Learning, Regression, Decision Trees, Random Forest, SVM
Data Science & Analytics:	EDA, Data Cleaning, Python (Pandas, NumPy, Scikit-learn), SQL, Statistical Modeling
Visualization & BI:	Power BI, Tableau, Advanced Excel (Pivot Tables, Dashboards)
Development & Tools:	FastAPI, Git, GitHub, VS Code, API Integration, ETL Pipelines.

PROJECTS

Gen AI Health Assistant , HCL & GUVI Hackathon Github Live Demo	Sep '25 — Nov '25
• Architected a Multimodal AI Pipeline: Integrated Llama-3.3-70B, Llama-4-Scout, and Whisper-Large-V3 to provide health guidance via text, voice, and image analysis. • Engineered Native Multilingual Support: Developed a cross-lingual system supporting Telugu, Hindi, and Tamil, significantly improving healthcare accessibility for rural users. • Optimized Performance: Leveraged the Groq SDK to achieve near-instant inference speeds, essential for time-sensitive medical symptom triaging. • Full-Stack Deployment: Containerized the application with Docker and deployed it on Hugging Face Spaces for scalable, public access.	
Delinquency Prediction , ApexPlanet Software Pvt Ltd Github	Dec '25 — Present
• Performed extensive EDA and Data Cleaning using Python (Pandas, NumPy) and SQL to identify key risk indicators and handle missing values in financial records. • Developed predictive models (e.g., XGBoost, Random Forest) to classify customer delinquency, helping mitigate potential financial losses for lending institutions. • Visualized risk trends by deploying interactive dashboards in Tableau/Power BI, translating complex model outputs into actionable business intelligence.	

AWARDS

Top Performer- HCL & GUVI Hackthon HCL Technologies &GUVI	Sep '25
Recognized for technical excellence in building [Gen AI Health Assistant]. Awarded a prize (Premium Headset) for demonstrating strong problem-solving skills in Python/Gen AI & AI Tools.	

EDUCATION

B.TECH in Artificial Intelligence & Machine Learning(AIML) , Sri Venkateswara College of Engineering & Technology (SVCET) Chittoor. (GPA: 7.71)	Aug '23 — Aug '27 Chittoor.
--	--------------------------------

CERTIFICATIONS

Generative AI and ChatGPT (5-Week Intensive) , GeeksforGeeks	Dec '24
Introduction to Artificial Intelligence , Infosys Springboard	Jan '26
